RE: RoHS Certification: Lexar Media Business Unit Production Line

Lexar Media certifies that our Pb-free CompactFlash products meet the requirements of the current DIRECTIVE 2002/95/EC, a.k.a. Restriction of Hazardous Substances (RoHS) Directive without exemptions. Lexar's Pb-free products mentioned above contain less than the following amounts of the six RoHS banned substances:

- Less than 0.1% Lead – Pb
- Less than 0.1% Mercury – Hg
- Less than 0.01% Cadmium – Cd
- Less than 0.1% Hexavalent Chromium – Cr (VI)
- Less than 0.1% Polybrominated Biphenyls - PBB
- Less than 0.1% Polybrominated Diphenyl Ethers - PBDE

Please note that our CompactFlash products do contain electronic ceramic passive parts that may use lead-oxides which are exempt from Directive 2002/95/EC (see Article 4, Section 2 and Section 7 of the Annex thereto).

The information provided above, applies to all Lexar products.

If you require further information beyond this statement, please contact me via electronic mail at [easifirad@lexar.com](mailto:easifirad@lexar.com) or by calling 510-743-4567.

Sincerely,

Essy Asefirad  
Quality Engineering Manager
