High-Speed Card for High-Speed Applications

Lexar offers a complete line of award-winning memory cards in various speeds, formats, and capacities. Lexar® speed-rated cards are individually performance tested before they ship, ensuring quality and performance and providing a higher level of confidence, whether you're snapping family photos on vacation or capturing HD video of an important event.

Designed for photo and video enthusiasts, the Lexar Platinum II CompactFlash® (CF) memory card is a high-performance card designed for sustained rapid-fire picture taking and full-motion video, two of the most popular features in today's digital cameras. The Lexar Platinum II CF card brings out the ultimate performance in your Digital SLR (DSLR) camera, and is available in 4GB, 8GB, and 16GB capacities.

Designed for Fast-Action Photos and HD Video

Maximize Your Photo- and Video-Taking Experience. Leverage the photo- and video-taking abilities of your point-and-shoot digital camera or digital camcorder. The Lexar Platinum II CF card is speed-rated at 80x, the equivalent of a minimum write speed capability of 12MB per second, which means that it's an excellent choice for shooting fast-action photos and capturing HD video.

One Card Does it All. The Lexar Platinum II CF card offers high-speed performance in large capacity options—ensuring you can always capture that perfect moment. Whether you're shooting and storing action photos or HD video, the Lexar Platinum II CF card is an excellent high-capacity, high-performance solution to your storage needs.

Lexar. When Memory Matters.™

The Lexar "x" speed rating describes minimum write speed capability where x=150KB/sec sustained write speed. Actual usable memory capacity may vary. 1GB equals 1 billion bytes.
