Capacities:

2GB

High-Performance Storage with Video Versatility

Lexar offers a complete line of award-winning memory cards in various speeds, formats, and capacities. Designed for photo and video enthusiasts, Lexar[®] speed-rated cards are individually performance tested before they ship, ensuring quality and performance and providing a higher level of confidence, whether you're snapping family photos on vacation or capturing HD video of an important event.

The Lexar Platinum II Secure Digital (SD[™]) memory card is a high-speed card for fast picture-taking, full-motion video, or use with other digital devices. The Platinum II SD card is speed-rated at a minimum speed sustained at 60x, the equivalent of a minimum write speed capability of 9MB per second, and is available in 2GB capacity.

Designed for Fast-Action Photos and HD Video

Maximize Your Photo- and Video-Taking Experience. If you've invested in a digital or Digital SLR camera, it's important to maximize that investment. The Lexar Platinum II SD card allows you to take a huge number of photos in quick succession using the "burst mode" feature of your camera, as well as fully leverage the video capabilities of your point-and-shoot digital camera. Using the Lexar Platinum II SD card means you can always capture that perfect moment.

One Card Does it All. The Lexar Platinum II SD card offers great versatility. It's the perfect place to save and store your vacation photos, as well as video clips from last weekend's soccer game. The card also has a built-in erasure prevention switch to ensure that your files can never be accidentally deleted or overwritten. The versatile Lexar Platinum II SD card is an excellent all-in-one solution to your storage needs.

Lexar. When Memory Matters.[™]

Warning: Some SD readers and cameras may not support 2GB or higher capacity cards. Please check with the manufacturer of the target device before using this card. Failing to do so may result in card damage and/or data loss.

The Lexar "x" speed rating describes minimum write speed capability where x=150KB/sec sustained write speed. Actual usable memory capacity may vary. 1GB equals 1 billion bytes.
